Medisoft® powered by eMDs is a proven, trusted, and affordable practice management solution designed to simplify the way you run your practice.

What's New in Medisoft V22?

Medisoft is already one of the most mature practice management systems on the market. It gets better each year as eMDs adds new layers of functionality and improved usability. Here are just a few notable additions:

Accounts Receivable Tracker

The new AR Tracker tool makes it easy for staff to drill down into their Accounts Receivable and work outstanding balances from within Medisoft. With advanced filtering capabilities and the ability to create and assign tasks, staff can create the exact workflows they need to follow up on balances and bring more of your revenue back in the door.

Enhanced Eligibility Checking

With the shift in payment responsibility to patients, it's more important than ever to get up to date eligibility benefits information at or before the time of service. eMDs has invested in major upgrades to the eligibility checking system including better automation with our recommended EDI partners.

Payment Processing Improvements

Batch posting of remittances has been upgraded to allow you to partial post. You can now print an EOB for a single claim. New filtering options make it easier to find claims that are ready to post and make you more efficient.

Claim Status Checking

Now you can initiate an electronic claim status check with our recommended clearinghouse partners and receive an electronic response that updates the status of claims making it even easier to know if you're going to be paid.

Expanded Mobile Functionality

Medisoft Mobile now includes a brand new user interface, new levels of customization for your superbills and patient questionnaires, and support for Apple iPhone and iPad devices.

Practice Management You Trust

Medisoft's longstanding reputation as one of the most stable, usable practice management systems continues into version 22. Enjoy a host of new features without sacrificing the workflows and customization on which your practice has come to rely.
